Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: Page 2, the recitation of "claim 1" should be deleted since during prosecution the scope of the claim changes making such statement untrue. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 1 calls for the "knife pivoting about the rotational axis of the driving wheels"; however such language is not consistent with the specification and/or drawings. Member (25) cannot pivot about axis (15) because as seen going from Figure 1 to Figure 3, as member (25) is elevated so is axis (15). Therefore, one skilled in the art cannot make and/or use the invention as described. Claim 2 calls for the "supporting plates pivotable about the rotational axis of the driving wheels"; however such language is not consistent with the specification and/or drawings. Member (12,13) move relative to member (19) and when the slots (24) of member (12,13) engages pin (23) of then member (19) and rotational axis (15) move together and not member (19)

Art Unit: 3673

pivoting about rotational axis (15). Therefore, one skilled in the art cannot make and/or use the invention as described.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 4,5, 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 and 5, "the support element" needs to be related back to "at least one support element" of claim 1.

Claim 8, "the supporting plates" lack clear antecedent basis.

Insofar the claims are understood, the following rejection(s) apply:

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Jacobs et al. (US 5098165).

Jacobs et al. discloses an apparatus (10) comprising a support frame (12,11), motor (27), drive (see Fig. 5), at least one support element (37) behind the driving wheels (13). A motor driven knife (14).

Conclusion
